Details make the difference

Technology

Cisa Group develops advanced infection control technologies for the safeguard of healthcare workers and the health of patients.

Healthcare

Complete central sterilizing service departments for hospitals (CSSD)

Sterilization for healthcare applications and clinics of all sizes

Disinfection and washing technologies for different operational requirements

Cisa Group is the technology partner for scientists, researchers and engineers who develop life-enhancing products every day.

Life Science

Washing and sterilization technologies for laboratories and research centres

Sterilization for pharmaceutical production

Bridging Science and Life

Cisa Group technologies comply with at least 6 of the 17 Sustainable Development Goals of the United Nations

Cisa Group, with 15 years of experience in the treatment of infectious waste, provides ground breaking solutions safe, economical and carbon friendly. Cisa Group is leading the field with the invention of its Waste Sterilization Department (WSD®).

Waste

WSD. Complete waste treatment department

WSM. Plug and Play Sterili-Station

Over the years it has developed unique proprietary IT and energy saving systems.

Software

Tracecare®

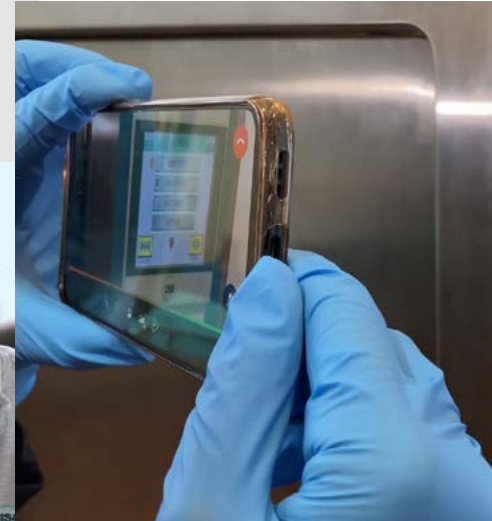

TraceWaste

Tracecare®. Traceability of the sterilization process for the reconditioning of surgical kits in CSSDs

TraceWaste. Traceability of the sterilization process for the treatment of infectious waste using Cisa WSD Waste sterilization departments

Service

The Customer Service Experience

Cisa Service is dedicated to providing its clients with quality technical assistance in order to ensure the performance of Cisa sterilization solutions and the reliability of the sterilization process.

The Service team is made up of Cisa specialists and a network of certified technicians and service centres who, together, support customers in Italy and all around the world. During the entire project journey customers are met by a team whose professionalism, technological know-how and process expertise guarantee unprecedented levels of care.

PRELIMINARY STAGES

ASSEMBLY AND INSTALLATION

AFTER-SALES

Planning and design of sterilization departments, support to clinical engineering and operational staff in the evaluation of washing-disinfection and sterilization technologies.

Assistance, tests and checks, support to clinical engineering and operational technicians, organising and programming training for operational staff.

Maintenance, assistance, original spare parts. Updates of IT tools and planning of specific training activities, with customized options.

Campus

Worldwide learning and training centre

Cisa Campus aims at establishing and promoting culture and knowledge to prevent the spread of infection in healthcare and life sciences settings.

Cisa Campus informs and trains on procedures and technologies dedicated to the sterilization process.

Thanks to this centre of excellence, Cisa staff and distributors remain up-to-date and highly specialized on the solutions and technology currently present in the sterilization and infection control industry and gain insight into the impact they have on sector developments.

Research

The DNA of innovation

Technological innovation is a process that affects every single component of Cisa Group's technologies.

Cisa Research is the hub for research and development. This is where special and customized projects for the sterilization process are created and evolve.

This is where we implement cutting-edge technical solutions for thermal disinfection and decontamination and for processes destined to become tomorrow's benchmarks in the healthcare, pharmaceutical and laboratory industries and in research labs.
